College of Education, Tehu  
Tal-Parola Dist-Jalgaon

### Action taken report on curriculum

2021-22

On the bases of feed back received from students, faculties & alumni on B.Ed curriculum the following action were taken:

- This Academic year is Covid-19 year. All the lectures , practical are online. student wish to attend the classes but is impossible in such situation. Principal ask to teachers to improve online lecture methods.
- Daling with technical part is now an integral part of the education system keeping this is view & also by considering the students requirement for the more technical sessions the institute will organised workshop in this area to equip students with the technological part of the teaching learning.
- Students suggestion to know the technique to handle the inclusive classroom to address the concern the college will conduct some workshop in this direction.
- Students suggestion is to cover topics for competitive examination too. For this faculties are requested to talk about the competitive examination too in their respective subjects.
- Student teachers expressed that more time period shall be allocated for the practice teaching. In this aspect it has to be mentioned that during the period of pandemic it was very difficult to get schools for the internship. School requirements were different programme online or offline learning The college made sufficient affords to prepare students for the online as well as offline teaching and meeting the requirements of the present time.
- A rigorous evaluation process considering the wide domain oof learner's personality. In this aspects it has to be mentioned that the curriculum assesses the wide domain of a students personality by means of theoretical and practical assignment like data collection community engagement, presentation, use of technology, teaching sessions etc. internal assignment also goes side by side to cater this need
- Not helpful for present day context as we can't submit the assignment in the typing version, we still have to submit it in written form which is outdated. Coursework and assignment also unnecessarily give ore burden to students. In this aspects the college adopted this strategy to improve the writing skill grammar skills and creativity.
- B.Ed. curriculum should be base on practical learning more than being theoretical students must be aware of real life situation and most importantly they must deal with the problems of government school as well.
- During internship effort ae made to provide private and government schools to students to get a proper experience of function of both types of schools. The institute conducts sessions for the students to provide them knowledge and requirements of different board too.

#### As per the suggestion received from the alumni

- Development of management/leadership skill is required among students. For this students will be given a certain programmes to organize by themselves under the guidance of the faculties
- Alumni suggested that while preparing for micro teaching and practice teaching do include exposure to primary classes for better development of the students teacher. So the institute will take proper measure to explain methods to use in primary classes too during the pedagogy classes and micro teaching.
